

REDU PROCESS FOR PROPERTY SELLERS

STEP 1: FREE CONSULTATION

Before you put your home or property on the real estate market, call or email us to set up an initial free consultation. We welcome the participation of your realtor as well. We prefer to meet at your property to determine which rooms are due for some "RE-IMAGINATION" and what design style fits your home's current layout.

STEP 2: DETAILED SURVEY

REDU will perform a detailed survey of the chosen rooms on your property in order to document their existing conditions, including room sizes, ceiling heights, lighting, electrical and plumbing locations, windows and doors. If a client has a copy of the homes blue prints, those can also be used.

STEP 3: RE-DESIGN BEGINS

Our design team gets to work and within 48 hours you will have digital copies of each item below.

- Realistic 3D images of each room with current design trends to transform your existing home into a home buyers dream

- Floor plans of the existing room and renovation with key elements highlighted and described

- Construction Cost Estimate Range

STEP 4: PUBLISH

With the help of your realtor, publish our digital renovation concept images online alongside the photos of your home to peak the interest of home buyers before they have even walked in the door. Inside your home, we can print large format images to show buyers the full potential of your home. Sometimes, they just need to see it to believe it.
